

## Product Introduction

## Control panel

- 1 Digital time display
- 2 Time adjustment buttons
- 3 Reservation button
- 4 Function buttons
- 5 Start/cancel button

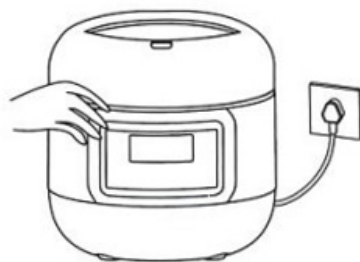

## Instructions for first use

### Need to know 1:

The main unit (outer pot) must be filled with water before the machine can work.

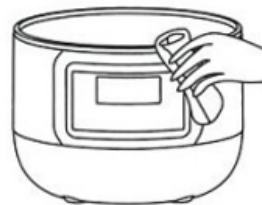

If no water is added to the main unit (outer pot), it will cause dry-burning power-off protection.

### Need to know 2:

If you want to stew directly, do not choose to make a reservation.

How long it takes to make an appointment means how long it takes for the machine to complete.

### Need to know 3:

After multiple uses, there is too much scale on the heating plate, which needs to be removed.

If the scale accumulates too much, it will cause dry burning and power failure protection.

Excluding the above points, the machine still cannot work normally, please consult customer service, we will patiently solve the problem for you.

## Steps to use

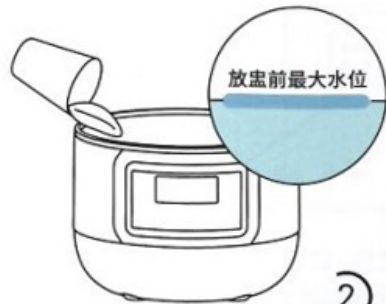

①

1. Put the cleaned ingredients into the stewing pot first, and then add an appropriate amount of water to the stewing pot as shown in Figure 1. It is recommended not to exceed 90% of the capacity of the stewing pot.

③

3. Then move the pottery as shown in Figure 3. Put the pure porcelain plate in the anti-scalding rack and put it Go to the host (outer pot) and cover it inside. Just cover it.

②

2. Add appropriate water to the main unit (outer pot) as shown in Figure 2, and refer to the type and amount of ingredients; be careful not to exceed the water level marked on the main unit (inner wall).

④

4. According to the type and amount of ingredients refer to the instructions used in this manual. After the setup is set up, the machine starts to work.

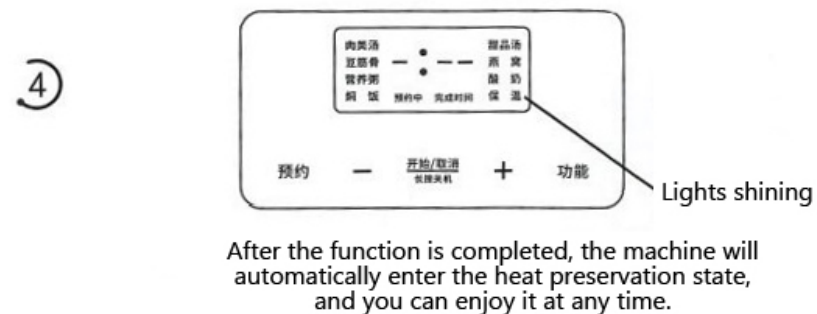

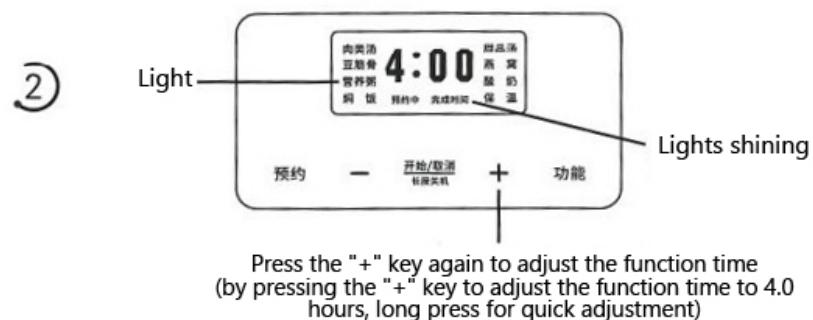

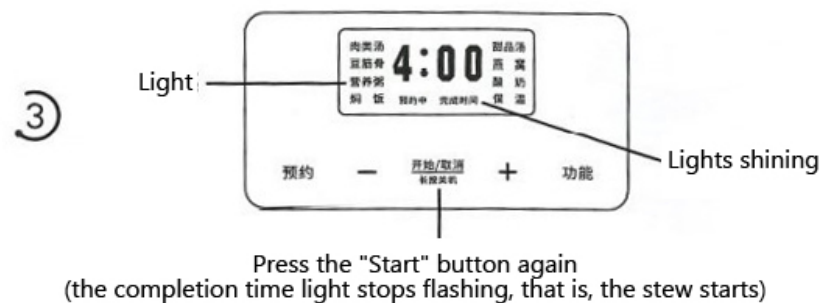

## Graphical function operation method

When no reservation is required, the operation method to start stewing directly:

Take cooking nutrition for 4 hours as an example

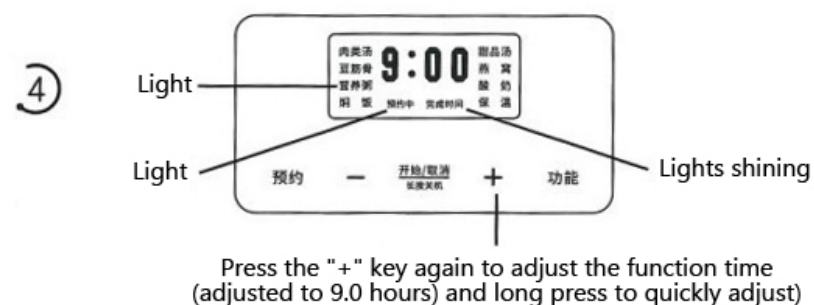

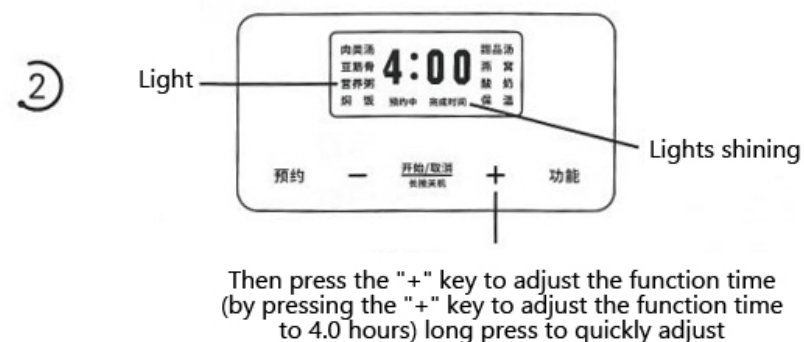

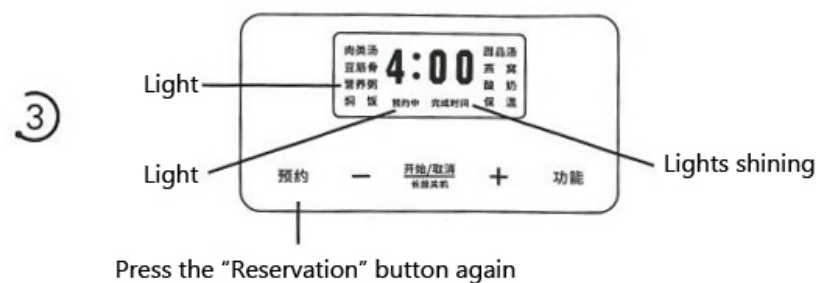

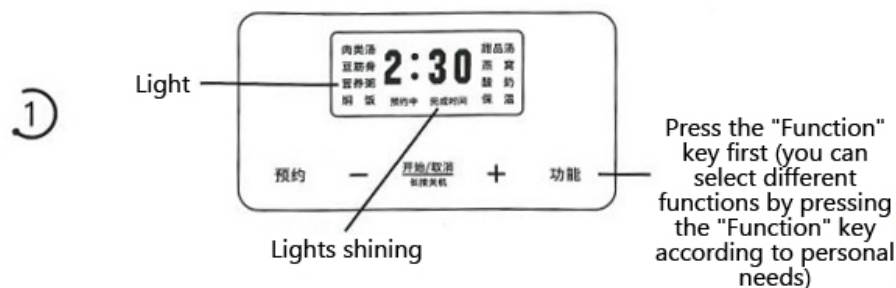

## Graphical function operation method

When it is necessary to make an appointment, the operation method of delaying the start of stewing:

Take the example of stewing nutritious porridge for 4 hours, now at 10 o'clock in the evening, and eat it at 7 o'clock in the morning

## Graphical function operation method

⑤

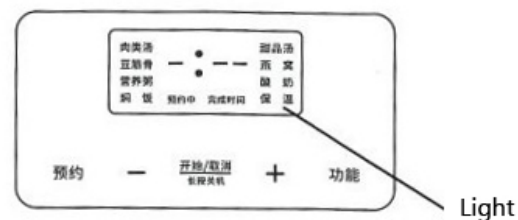

Press the "Start" button again (the completion time light stops flashing and enters the reservation state)  
(this 5-hour machine is in a countdown state, no heating)

⑥

Automatically enter the stewing work after 5 hours

⑦

After 4 hours of stewing, it will automatically enter the heat preservation state (the food is just finished at 7:00 in the morning)

### Reminder:

Choose different stewing functions according to personal preferences. Due to the different characteristics of various ingredients, you should set an appropriate appointment time according to your life experience to prevent the ingredients from deteriorating due to the long appointment time.
